HOW DID YOUR INDIVIDUAL USE OF THE LIBRARY COMPARE DURING THE TWO YEARS?

MAYBE YOU ARE NOT A LIBRARY PATRON AT ALL. IF NOT, WHY NOT?

(All you have to do to become a regular library patron is to ask us for things you need--books, periodicals, answers to questions, lists of books on a subject, etc.)

DO YOU ASK FOR A BOOK OR OTHER PUBLICATION WHEN YOU NEED IT IN YOUR WORK?

DO YOU RECEIVE SOME OF THE PERIODICALS THE LIBRARY TAKES FOR YOUR USE?

DO YOU CALL ON THE LIBRARY FOR HELP WITH QUESTIONS WHICH YOU CANNOT ANSWER FROM THE INFORMATION AT HAND?

DO YOU SEE THE MONTHLY ISSUES OF THE LIBRARY NEWSLETTER AND THE BIBLIOGRAPHY OF AGRICULTURE?

WE ARE HAPPY TO SERVE YOU IN ANY WAY AND SHALL BE GLAD TO WELCOME YOU AS A REGULAR LIBRARY PATRON.

*Changes in the number of offices and personnel in an agency are of course reflected in library use.

NEW BOOKS IN THE LIBRARY

THE CROSS TIMBERS, by Carolyn T. Foreman. Star Printery, Muskogee, Okla., 1947. 123p. 138 F762

This little book is a collection of accounts of the Cross Timbers of Texas and Oklahoma written by explorers, army officers, and emigrants. The excitement of adventure pervades its pages.

GROWTH OF PLANTS, by William Crocker. Reinhold, 1948. 459p. 463.36 C87

Anyone interested in the science of plant life will spend fascinating hours reading this critical summary of the research work carried on at Boyce Thompson Institute. The introduction gives an endearing picture of Colonel William Boyce Thompson. There are chapters on the life span of seeds, dormancy in seeds, the effect of certain lethal gases upon plants and animals, plant hormones, dormancy in buds, plant cell membranes, plants grown under controlled environmental conditions, and other subjects.

OUR PLUNDERED PLANET, by Fairfield Osborn. Little, Brown, 1948. 217p. 279 Osl

Of this book by the President of the New York Zoological Society, Aldous Huxley said: "In Our Plundered Planet, Mr. Osborn has told, with admirable clarity, the story of man's ignorant or wanton disregard of the fundamental laws of life and of the terrible revenges which Nature has taken and is still taking, inexorably, against those who have outraged her. May the book attract the attention which, by reason of its all-important subject matter and the lucidity of its style, it so richly deserves!"

RECORDS MANAGEMENT AND FILING OPERATIONS, by Margaret K. Odell and Earl P. Strong. McGraw-Hill, 1947. 342p. 249.2 Od2

"This book aims to assist management in recognizing the need for a records department with sufficient authority and control to make the functions of filing and record keeping distinct in the organizational structure. In addition, it furnishes suggestions to aid management in the establishment and organization of a records management department. It also will assist records-department employees in better performance of their daily operations." From the Preface of the book.

A NOTE TO SOIL CONSERVATION SERVICE PEOPLE

Some time ago quite a number of you requested three books which Mr. Hammett had recommended that you read: Erosion in the Punjab, by Glover; New World To Win, by Van Rinsburg and Palmer; and Soil Erosion in New Zealand, by Cumberland.

Our dealer has notified us that his attempts to secure Erosion in the Punjab have failed. The book is unavailable and our order has been canceled. We have fifty of your names on reserve, and we cannot notify you individually, so I hope each of you will read this note and know that your request has been canceled.

The other two books were never listed in the Newsletter as we had long reserve lists for them before we received the books. Now our copies of Soil Erosion in New Zealand are on the shelves and available to those who may still be planning to read that book. *

We still have twelve names on our reserve list for New World To Win.

* SOIL EROSION IN NEW ZEALAND: A GEOGRAPHIC RECONNAISSANCE, by K. B. Cumberland. Whitcombe & Tombs, 1947. 2nd ed. 228p. 56.7 C91
